Overview

Developed by ACER, with the support of John XXIII College in Perth, the Attitudes and Values Questionnaire (AVQ) is a tool to gather meaningful data on secondary school students' social, moral and spiritual development.

The AVQ provides an opportunity for schools to formally measure, and report to parents and community, how well they are upholding their mission statements. The AVQ assesses the school's capacity to develop moral, ethical, socially responsible students who can accept responsibility for their decisions and their place in the world.

Benefits for schools

- Gauge how effectively the school is contributing to aspects of the students' emotional, social and spiritual development

- Target areas within the school for further resourcing and development
- Assess specific initiatives

The questionnaire addresses the following social dimensions:

- Conscience
