

The sausage sizzle

Class 5C is planning to run a sausage sizzle at the school fete.

What kind of sausages should be sold? What other food items could be sold as well?

What do you think would be a good way to find out which are the most popular food items?

Once you find out everyone's favourite items, what would be the best way to display that data?

How many of each item should be made? How could you work this out?

How could you work out the profit that would be made on each item?

Do you think the sausage sizzle would make enough money to be worthwhile?
