

## Inclinometers

How could you improve the way that you measure the angle to the top of the flagpole?

---

---

---

How could you construct an inclinometer to help you measure the flagpole? What factors would you need to take into account?

---

---

---

Use your inclinometer to measure the flagpole. What is the new result?

---

Does the class get better results this way? How would you know that the answer is better?

---

---

---
