

## Three display boxes

Penny has puppies, kittens and rabbits for sale in her pet shop.

Penny has **five** animals in total.

This picture shows one possible set of animals. Can you draw another one?

For each of these questions, say whether it is *certain*, *very likely*, *more likely*, *unlikely* or *impossible*.

What are the chances of finding five animals in Penny's Pet Shop?

---

What is the chance of finding six animals in the two glass boxes for kittens and rabbits?

---

What is the chance of finding more than three kittens or more than three puppies?

---

What is the chance of finding no kittens?

---

Is it more likely or unlikely that there are more than two puppies or less than two puppies?

---
