

More than six animals

Penny has puppies, kittens and rabbits for sale in her pet shop.

Penny has **six** animals in total in the three display boxes. Can you draw a picture of them?

--	--	--

For each of these questions, write down whether it is *certain*, *very likely*, *more likely*, *unlikely* or *impossible*.

What are the chances of finding six animals in Penny's Pet Shop?

What is the chance of finding seven animals in the two glass boxes for kittens and rabbits?

What is the chance of finding more than four kittens, or more than four puppies, or more than four rabbits?

What is the chance of finding no kittens?

Is it more likely or unlikely for there to be more than three puppies or less than three puppies?
