

Mr Peter Rowe

Q. Brief submission

R. I have two suggestions:

1. That the Education Department provide scholarships for people to undertake university degrees majoring in Mathematics plus teacher training, with a guarantee of employment for a specified period following graduation. Such scholarships should cover the cost of tuition, plus a living allowance.

2. That all students from Grade 9 to Grade 12 study the same language other than English. This should be supported by the same requirement from Kindergarten to Grade 8. This issue should not be confused with what that language should be, on which I express no opinion.

Q. Declaration

R. This is a public submission - it does NOT contain 'in confidence' material in the main submission or its attachments, and can be placed on ACER's website.
