SEARS-A Scale Overview

The SEARS-A is a strength-based, multidimensional self-report measure of social strengths and resilience. The SEARS-A consists of 35 items tapping self-regulation, responsibility, social competence, and empathy. The SEARS-A has the following four scales:

- The **Self-Regulation (SR)** scale measures self-awareness, meta-cognition, intrapersonal insight, self-management, and direction.
- The **Social Competence (SC)** scale measures the ability to maintain friendships with peers, engage in effective verbal communication, and feel comfortable around groups of peers.
- The **Empathy (E)** scale measures the ability to empathize with others' situations and feelings.
- The **Responsibility (R)** scale measures the ability to accept responsibility, behave conscientiously, and think before acting.
