

# Social-Emotional Wellbeing Survey: Secondary

between 20-04-2018 and 05-06-2018 for selected students

## SEW score

The SEW score shows this group of students location on the SEW scale. This category is an overall score based on all questions answered within the survey. The 'mean' score reports the average level of social-emotional wellbeing for students surveyed in your school and across all schools participating in the survey. A higher mean score indicates that this particular student cohort on average enjoys a higher level of social-emotional wellbeing than student cohorts with a lower mean score. The standard deviation (Std. Dev.) is also an important data point as it indicates the extent of variation in students' individual social-emotional wellbeing scores. The higher the standard deviation score, the wider the variation is in individual student scores as usually represented by a bell curve.

## Your school

	N	Mean	Std. Dev.
Year 7	20	113.2	5.5
Year 9	20	112	7.5
Year 11	20	111	8.5
Total	60	112.1	7.3

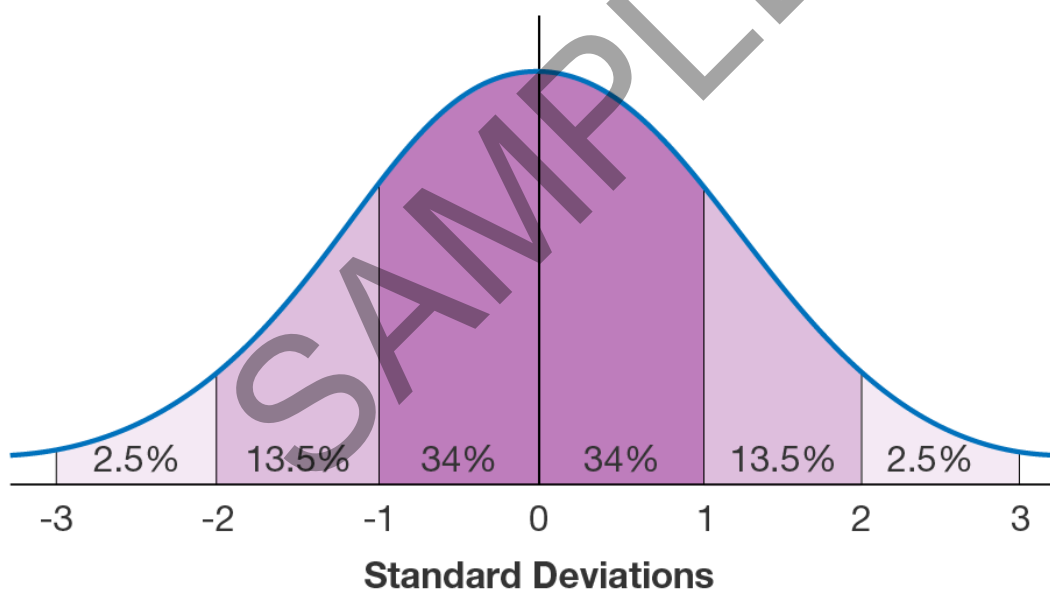

## All schools

	N	Mean	Std. Dev.
--	---	------	-----------

	<b>N</b>	<b>Mean</b>	<b>Std. Dev.</b>
Year 7	4337	117.4	10.4
Year 9	3838	113.6	9.8
Year 11	3087	113.5	9
Total	20467	114.7	10

## Tips for teachers

### Interpreting standard deviation

You can use the standard deviation of a mean SEW score to calculate the distribution of SEW scores for a student cohort.

- Adding and subtracting one standard deviation from the mean score will indicate the score range of the middle 68% of students.
- Adding and subtracting two standard deviations from the mean score will indicate the score range of the middle 95% of students
- Adding and subtracting three standard deviations from the mean score will indicate the score range of 99.8% to 100% of students.

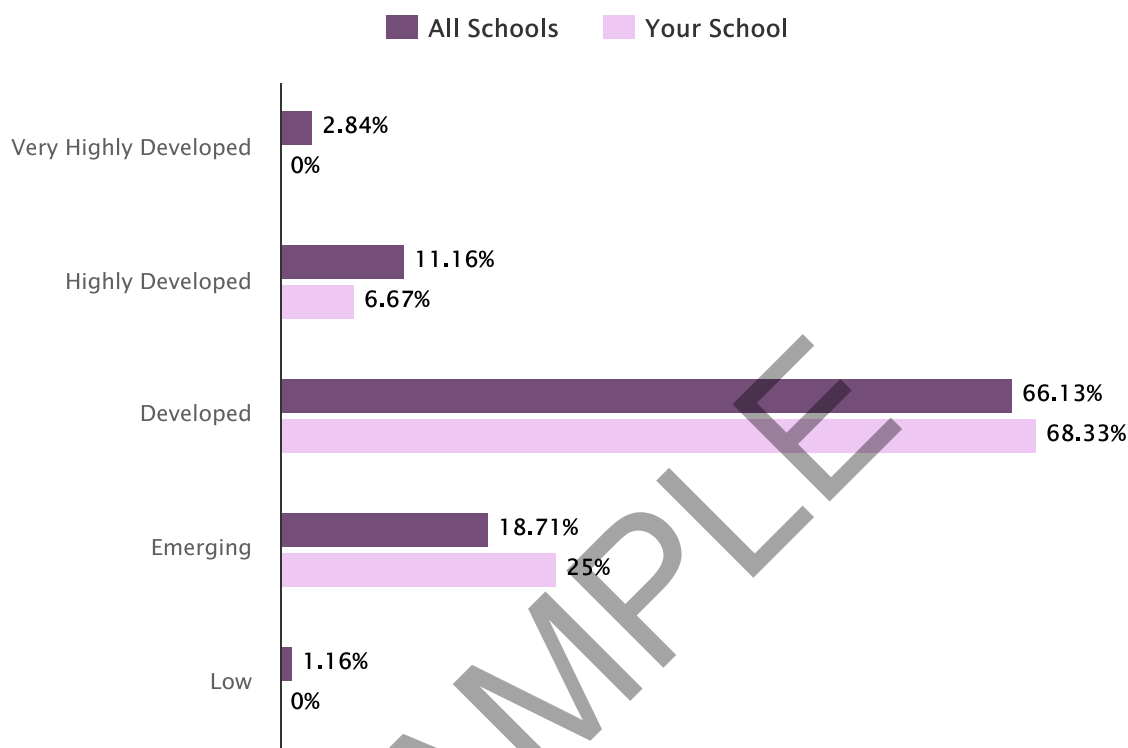

It is important to compare standard deviations as well as mean scores to understand how broadly the students' social-emotional wellbeing scores vary within a particular cohort.

SAMPLE

# Overall social-emotional wellbeing

The overall social-emotional wellbeing report provides a comparison of all students from your school and all schools, as distributed across each of the five developmental levels.

## Your school

	No. of students	Percentage
Very Highly Developed	0	0
Highly Developed	4	6.7
Developed	41	68.3
Emerging	15	25
Low	0	0

## All schools

	No. of students	Percentage
Very Highly Developed	582	2.8
Highly Developed	2284	11.2
Developed	13535	66.1
Emerging	3829	18.7
Low	237	1.2

### Results by year level

This is the distribution of overall social-emotional wellbeing of your school’s students across developmental levels for each year level.

	Year 7	Year 9	Year 11
Very Highly Developed	0	0	0
Highly Developed	1.67%	3.33%	1.67%
Developed	30%	20%	18.33%
Emerging	1.67%	10%	13.33%
Low	0	0	0

	Year 7	Year 9	Year 11
Very Highly Developed	0	0	0
Highly Developed	1	2	1
Developed	18	12	11

	Year 7	Year 9	Year 11
Emerging	1	6	8
Low	0	0	0

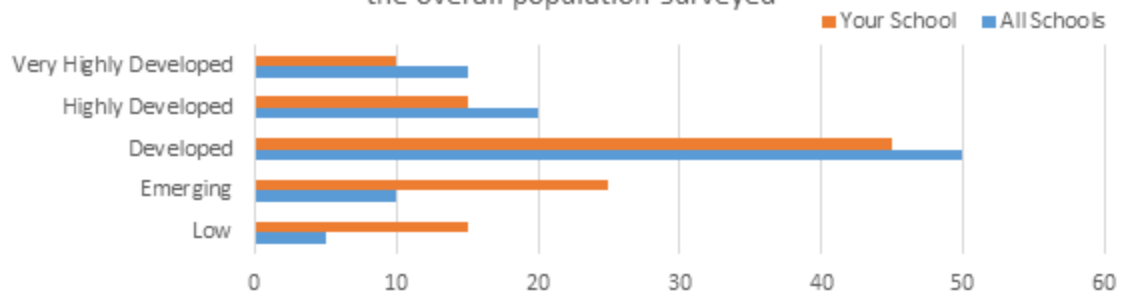

## Tips for teachers

### Comparing distributions

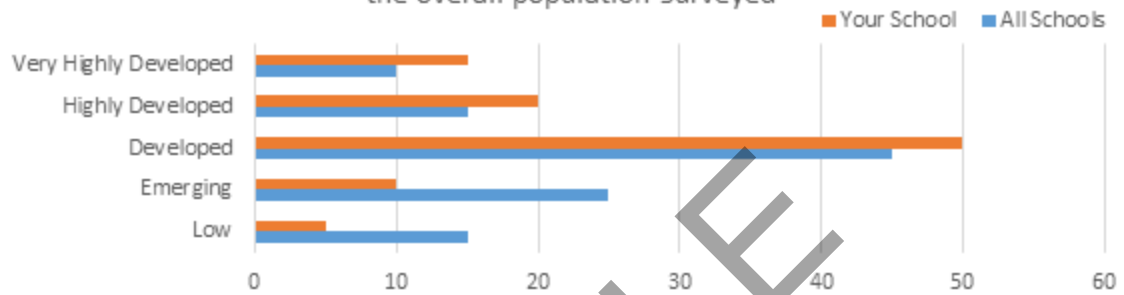

When comparing social-emotional wellbeing distributions, teachers should consider the following:

- Are the proportions of your schools' students categorised as 'low' and 'emerging' less than, greater than or similar to the 'all schools' proportions? A lower proportion of your school's students in these developmental levels indicates that your school has less students in the lower developmental levels than most schools.
- Are the proportions of your schools' students categorised as 'highly developed' and 'very highly developed' less than, greater than or similar to the 'all schools' proportions? A higher proportion of your school's students in these developmental levels indicates that your school has more students in the higher developmental levels than most schools.
- Is there a trend for when comparing your schools' students with the all schools students such as:

Negative trend: Your school's students are not as well developed as the overall population surveyed

Positive trend: Your school's students are more highly developed than the overall population surveyed
