

# ART-2 General / Clerical Standard Report

The Applied Reading Test - Second Edition (ART-2) General / Clerical Form is a measure of the ability to understand written material commonly seen in the context of an administrator / clerical position or course. It is indicative of the ability to read and understand information in a variety of formats (e.g., emails, signs, instructional texts, brief legal notes). This involves the ability to recognise the words, understand what they mean individually and in a sentence, as well as apply and demonstrate this understanding when answering the questions.

Name	Sub-test	Raw Score	Scale Score	%tile Rank	Stanine
J. Goodluck	General / Clerical	25	68	46	5 (Average)
K. Happy	General / Clerical	30	100	100	9 (Very High)
A. Smith	General / Clerical	26	71	55	5 (Average)

**Percentile Ranks** show the percentage of the reference group with scores below the candidate's score. For example, a percentile rank of 58 means the candidate has scored better than 58% of the reference group. It ranges from 0 to 100, with a higher score indicative of a higher level of reading ability.

**Stanines** provide a score for the individual compared to the reference group ranging from 1 to 9, with higher scores indicative of a higher level of reading ability. For example, a stanine of 2 means the candidate has scored well below average in comparison to the reference group.

**ART-2 Scale Scores** provide scores for individuals that can be compared across test forms (e.g., scores on the General / Clerical form can be compared with those on the Technical / Trades form). ART-2 scale scores range from -21 to 100, with a higher score indicative of a higher level of reading ability.
