

ART-2 Basic Literacy Results

K. Happy

The Applied Reading Test - Second Edition (ART-2) Basic Literacy Booklet is a measure of the ability to understand written material commonly seen in the context of an operational role or trades position or basic course of study. It is indicative of the ability to read and understand information in a variety of formats (e.g., signs, diagrams and simple text commonly found in a warehouse, factory or manufacturing plant) and is suitable for those with little formal education or those who come from a non-English speaking background. The test involves the ability to recognise the words, understand what they mean individually and in a sentence, as well as apply and demonstrate this understanding.

Candidate Name:	K. Happy
Test:	ACER ART-2
Sub-test:	Basic Literacy
Raw Score:	25
No. of Questions Attempted:	25
Maximum Possible Raw Score:	30
ART-2 Scale Score:	60
Percentile Rank:	59
Stanine Score:	5 (Average)

Percentile Ranks show the percentage of the reference group with scores below the candidate's score. For example, a percentile rank of 58 means the candidate has scored better than 58% of the reference group. Percentile ranks range from 0 to 100, with a higher score indicative of a higher level of reading ability.

Stanines provide a score for the individual compared to the reference group ranging from 1 to 9, with higher scores indicative of a higher level of reading ability. For example, a stanine of 2 means the candidate has scored well below average in comparison to the reference group.

ART-2 Scale Scores allow for comparisons among test-takers using different test forms. For more information, please look in the manual.
